AI Builder — Take-Home

Choose one task. Build something real.

We hire people who build. Pick **one** task from the six below and build a working version with any AI tools you like (Claude, Cursor, Lovable, v0, Bolt — anything). We're not scoring *which* one you pick, so choose the one that shows your best work.

> **The golden rule — show, don't tell.** If we can't open it and use it ourselves, it doesn't count. No slide decks, no architecture documents. A working thing, or it's a no.

> **What we look at hardest — your data model.** Design the schema behind whatever you build properly: the tables, relationships, keys, and edge cases. Postgres, SQLite or clean JSON — we care that the model is *right*. Walk us through it in your video. For us, this is where your technical grip shows.

Choose your task

VOICE TASKS

4/10 **V1 The Order-Taker**

A voice agent that takes a full food order — items, modifiers, mid-order changes, running total.

5/10 **V2 Reminder Caller**

An outbound agent that confirms appointments or nudges invoices and logs the outcome.

6/10 **V3 Patient Intake**

A voice agent that runs adaptive pre-visit intake and escalates anything urgent.

DOCUMENT TASKS

5/10 **D1 Menu Digitiser**

Turn photos of a paper menu into a clean, import-ready digital catalog.

5/10 **D2 Receipt Reconciler**

Match receipt photos against a card statement and surface every discrepancy.

6/10 **D3 Resume Screener**

Rank resumes against a JD with reasons — and catch the ones that don't add up.

How to submit

- **A live link** — your task deployed and working. Documents: a web app we run on your files. Voice: a web-call page or a phone number. Keep it live 2 weeks.
- **A 4–6 minute video** — demo it, then explain your key decisions, your data model, what you faked vs. built, and what you'd do with another week.
- **No GitHub repo, no written report.** The video carries your thinking.

Time & scope

72 hours. Budget a focused day or two — don't over-build. A tight, honest submission beats a sprawling one. Tell us what you'd do with more time; don't actually spend it.
